

THE IMPORTANCE OF TEACHING THE SUBJECT "LEGAL BASIS OF MEDICAL ACTIVITY" IN THE TRAINING OF FUTURE DOCTORS

Safoev Nurali Nematulloevich

The development of the socio-economic spheres of our republic, further improvement of the quality of personnel training in the system of higher and secondary specialized, higher education; increasing students' inquisitiveness, creativity, thinking abilities, and speech culture in vocational training based on modern achievements of science, technology, and technology; purposeful and effective use of information and communication technologies in mastering the secrets of professions; formation of students' skills for independent work is one of the most pressing problems of today.

In the formation of professional skills of future specialists in the context of modern education, the development of their abilities for independent learning and a creative approach to problem-solving is of great importance. These characteristics are formed through the development of students' independent thinking abilities and the activation of their cognitive activity.

Currently, in lectures and practical classes on the subject "Legal Basis of Medical Activity," students are familiarized with the legislation on the protection of citizens' health, professional offenses of medical workers, and regulatory legal acts in the field of healthcare. Disciplinary, administrative, and civil acts, crimes of medical workers, their characteristics, and the causes of their occurrence, observed in practice, are studied using specific examples, and the essence of medical care defects, the reasons for their occurrence, their impact on the outcome, and their legal assessment are considered.

The purpose of teaching the subject "Legal Basis of Medical Activity" is to see that the number of offenses committed by medical workers has been

increasing in recent years. Not only doctors, but also nurses with higher education play a significant role in this. For the effective, free activity of medical workers, along with professional skills, appropriate legal training is required. Therefore, the teaching of the subject "Legal Basis of Physician Activity" in the medical education system is of great importance.

Every teacher working in the field of medicine should be aware of the state and problems of medical practice in this area.
